PROFESSIONAL SUMMARY

Computer Science undergraduate at Madras Institute of Technology, Anna University, with hands-on experience designing, building, and deploying full-stack, real-time, and AI-integrated applications to production, including a published developer-tools extension. Proficient in Java, Python, React, Node.js, Angular, Express.js, FastAPI, and SQL, with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and REST API design. Experienced across authentication and authorization, real-time communication, cloud databases, and third-party AI/API integrations. Seeking a Software Engineering internship to apply strong technical fundamentals and product-building experience to real-world engineering problems.

EDUCATION

Madras Institute of Technology, Anna University — B.E. CSE — CGPA: 8.29/10 (Sem 3) — Expected 2028
Saradha Matriculation Higher Secondary School — Class 12: 96.83%

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Frontend: React.js, Angular, TypeScript, Vite, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, FastAPI, REST APIs, Socket.io, JWT Auth

Databases & Cloud: Supabase (PostgreSQL/Auth), MongoDB, Firebase, SQLite

Tools & AI: Git, GitHub, VS Code Extension API, Google Gemini API, Docker, Vercel, Render, Postman

PROJECTS

CollabCode — Real-Time Classroom Coding Platform + VS Code Extension

React • TypeScript • Node.js/Express • Socket.io • Supabase • Google Gemini API • VS Code Extension API
github.com/Nitesh-N-D/CollabCode

- Built a production-grade monorepo — dashboard, VS Code extension, backend server, and student portal — enabling instructors to monitor live coding sessions, assist individual students privately, and replay classroom activity in real time via Socket.io.
- Published a VS Code extension on the official Marketplace that lets students join classrooms, request private help, and view live hints without leaving their editor, bringing the collaboration layer directly into their IDE.
- Integrated Google Gemini for context-aware, Socratic-style AI hints (guiding questions over direct answers), with a deterministic rule-based fallback; used Supabase (PostgreSQL + Auth) for multi-classroom data isolation and Docker for reproducible Render/Vercel deployment.

HostelHub — Hostel Management Platform

Angular • Node.js • Express.js • MongoDB Atlas • JWT • Socket.io
github.com/Nitesh-N-D/HostelHub

- Built a full-stack MEAN-stack platform automating hostel room allocation, student record management, and outpass requests, replacing manual paper-based tracking with a centralized digital system.
- Implemented JWT + bcrypt authentication with role-based access control, giving students, wardens, and admins distinct, secure permission levels across the application.
- Added real-time Socket.io notifications so students and wardens receive instant updates on outpass approvals and complaint status, removing the need for manual follow-ups.

CampusAir — Smart Campus Communication Platform

React • Vite • Tailwind CSS • Node.js/Express • MongoDB • Socket.io • Cloudinary
github.com/Nitesh-N-D/Campus-Air

- Built a centralized campus communication hub delivering real-time announcements, urgent alerts, and event updates to students and administrators through a single platform.
- Designed a responsive, mobile-first UI with role-based views, giving administrators content-management controls while keeping the student experience simple and fast.
- Integrated Google OAuth for secure sign-in, Cloudinary for media uploads, and Socket.io for instant push-style updates across all connected clients.

SkillShare — Peer Skill-Sharing Platform (Group Project) — Role: Frontend Developer

React • TypeScript • Firebase Auth • Firestore
github.com/Nitesh-N-D/SKILL-SHARE_REPO

- Led frontend development for a peer skill-sharing platform, building a fully responsive UI in React and TypeScript that connects students for skill exchange and mentorship.
- Integrated Firebase Firestore for real-time data sync and Google OAuth for authentication, and architected a reusable component structure for browsing, booking, and profile management flows.

LEADERSHIP & LANGUAGES

- Member, ACM MIT Student Chapter — Active member participating in technical events, workshops, hackathons, and chapter initiatives.
- NSO Volunteer — recognized for discipline, teamwork, and consistent participation.

Languages: English, Tamil, Hindi, Telugu
