PROFESSIONAL SUMMARY

Computer Science undergraduate at Madras Institute of Technology, Anna University, with hands-on experience building full-stack and AI-powered applications. Proficient in Java, Python, React.js, TypeScript, Node.js, FastAPI, and SQL, with a solid foundation in Data Structures & Algorithms, Object-Oriented Programming, and REST API development. Passionate about engineering scalable, impactful software — and driven to grow through challenging problems, emerging technologies, and high-performing collaborative teams.

EDUCATION

Madras Institute of Technology, Anna University

B.E. Computer Science and Engineering | CGPA: **8.29 / 10 (Till Sem 3)**

Expected Graduation: 2028

Saradha Matriculation Higher Secondary School

Score: 96.83% | Class 12

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB, SQLite, Firebase

Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, Ollama

Core Concepts: OOP, Data Structures & Algorithms, Full-Stack Dev, API Integration, Debugging, Agile

PROJECTS

CollabCode — Real-Time Collaborative Coding Platform [GitHub](#) | [Live](#)

React • Node.js • WebSockets • AI-assisted Learning

- Live collaborative coding environment enabling instructors and students to write and execute code together with real-time sync and AI-assisted learning features.
- Implemented WebSocket-based bi-directional communication for zero-latency code sharing and live session management across multiple concurrent users.

CampusAir — Smart Campus Communication Platform [GitHub](#) | [Live](#)

React • Node.js • Firebase • REST APIs

- Dynamic campus platform for University students to access real-time announcements, events, urgent alerts, and campus updates in one centralized place.
- Built a RESTful API layer with Node.js and integrated Firebase for real-time data sync and instant push notifications across the campus community.
- Designed a responsive, mobile-first UI with role-based views for both students and administrators to manage and consume campus content efficiently.

HostelHub — Hostel Management System [GitHub](#) | [Live](#)

Angular • Node.js • MongoDB • Express.js • MEAN

- Full-stack MEAN application for hostel room allocation, student records management, and admin dashboard with secure CRUD operations.
- Implemented JWT-based authentication and role-based access control to manage student and warden permissions securely across the system.

SkillShare — Peer Skill-Sharing Platform (Group Project) [GitHub](#) | [Live](#)

React • TypeScript • Firebase • Real-time DB | Role: Frontend Developer

- Led the frontend development using React and TypeScript, delivering a fully responsive UI with Firebase real-time database integration and Google OAuth authentication.
- Architected reusable component structure and smooth UX flows for skill browsing, session booking, and user profile management across the platform.

ACHIEVEMENTS

- Successfully built and deployed multiple full-stack and AI-powered projects independently and in teams.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- NSO Volunteer — recognized for discipline, teamwork, and consistent participation.
- Active contributor to collaborative software development projects and open-source repositories.
- Continuously practices coding and problem-solving (DSA, OOP) to strengthen core CS fundamentals.
